

Medical Device Manufacturer Cogmedix Announces New Customer Wins

US-based contract manufacturer expands customer base in the home healthcare, aesthetics and critical care markets

WORCESTER, Mass. – April 14, 2009 – [Cogmedix](#), a US-based, FDA compliant contract manufacturer for medical and clinical devices, today announced three new customer wins in the home healthcare, aesthetics and critical care markets. The customers are the latest medical device companies partnering with Cogmedix for reliable and economical outsourcing options in the United States, rather than shipping manufacturing overseas.

Hemedex, a Massachusetts-based company conceived at the Massachusetts Institute of Technology (M.I.T.), develops and manufactures devices that quantify blood perfusion at the capillary level for applications in a range of clinical care indications. The company selected Cogmedix to manufacture its Bowman Perfusion Monitor® which calculates, stores and displays perfusion data.

Elemé Medical, Inc., a venture backed aesthetics company dedicated to providing market-leading technology in all areas of body shaping, selected Cogmedix to manufacture its SmoothShapes® technology. Developed using Elemé Medical's Photomology® technology, SmoothShapes is designed to offer a new and innovative way to treat cellulite safely and effectively, and achieve long-lasting results.

Cogmedix was also chosen by a leading healthcare company to manufacture its innovative in-home telehealth patient monitoring system that remotely collects and manages patient vital signs and information. The in-home system is designed, delivered and supported as a complete solution that enables quality healthcare for elderly, special needs, pediatric and other patients with chronic illnesses and provides new levels of flexibility and ease of use for patients, caregivers and health providers.

“When selecting a contract manufacturing partner for our SmoothShapes product, we were looking for a company with deep expertise in the medical device industry that could serve as a seamless extension of our business,” said Jose do Val, Elemé Medical. “Cogmedix consistently gives us the highest quality manufacturing possible and always has our company’s best interests

in mind. Cogmedix's flexibility, attention to detail and customer service makes them an invaluable contract manufacturing partner."

According to Dr. Fred Bowman, founder and CEO of Hemedex: "Working with Cogmedix has helped us focus on our core business with the peace of mind that our product is being manufactured with the highest level of quality and care. Cogmedix's service and reliability, and that of its sister company Columbia Tech, have made it a long-term, trusted contract manufacturing partner."

"We continue to see growing interest from medical device companies looking to decrease manufacturing costs without sacrificing quality, compliance, intellectual property protection or patient satisfaction," said Chris Coghlin, founder and CEO of Cogmedix. "As an FDA compliant outsourced contract manufacturer, Cogmedix is able to provide reliable and regulated conditions for the safe and cost-effective production of today's cutting-edge medical device technologies."
