DCI Engineering Services moves to Worcester Business Center to Accommodate Growth

Worcester, MA—DCI Engineering Services, a subsidiary of Coghlin Companies, Inc. has moved into the Worcester Business Center, 67 Millbrook Street in Worcester, Massachusetts. More than 40 employees will occupy the 21,000 square-foot office and engineering facility that will be used for product development, prototype fabrication, laboratory testing, pilot production and final product test and validation.

“The current and future growth of DCI will require a facility that enables rapid expansion,” stated John DeCarlo, Executive Vice President of DCI. “The proximity of the WBC to our Columbia Tech manufacturing facilities on Briden Street and Prescott Street made this location very appealing during our selection process. This new facility will enable more space for employees, equipment, and future business expansion. We remain focused on developing the most cost effective, flexible and versatile product development engineering services company in the Northeast, and we are pleased to have identified a location to support our growth in Worcester”.

DCI Engineering Services and Columbia Tech are subsidiaries of Coghlin Companies, Inc., a family owned company in its fourth generation of operation in Worcester, MA. Combined, the two companies turn innovation opportunities into commercially viable products. Columbia Tech and DCI provide a wide range of manufacturing, engineering and fulfillment services to a diversified group of industries including; semiconductor, medical device, food service, storage, networking, alternative energy, security and military.
