

Coghlin Companies and Oxford Global Resources Partner to Meet Growing Demand for Cost-Effective, Domestic Manufacturing Services

WORCESTER, Mass. – June 30, 2009 – Coghlin Companies, a privately held firm specializing in creative design, engineering, manufacturing, and global fulfillment solutions, today announced its partnership with Oxford Global Resources, Inc., a leading provider of senior engineering consultants, project teams, and strategic outsourcing services, to widen sales coverage and broaden its base of clientele in both engineering services and contract manufacturing.

Oxford Global Resources delivers senior engineering consultants to clients for rapid turnaround engineering projects across a wide range of manufacturing industries such as aerospace and defense, electronics, energy, instruments, medical devices, pharmaceuticals, and transportation. As part of the agreement, Oxford Global will match its customers' needs with the contract manufacturing and design services provided by Coghlin Companies' wholly owned subsidiaries.

"Coghlin Companies' four generations of experience with engineering and manufacturing for leaders in high-tech industries like medical devices, semiconductors, alternative energy, homeland security and defense systems makes them a strong addition to our partner network," said Kristin Segalini, Business Development Manager, Oxford Global Resources.

Coghlin Companies' wholly owned subsidiaries, DCI Engineering Services, Cogmedix, and Columbia Tech, specialize in product development assistance, prototype, pre-manufacturing, and compliance testing to deliver complete manufacturing solutions for customers seeking any combination of turnkey design, manufacturing, and global fulfillment services.

"Oxford Global Resources' proven track record for delivering and managing projects will help us expand our customer base and broaden our geographic area," said Chris Coghlin, President and CEO, Coghlin Companies. "We're excited to partner with such a reputable company in the engineering field. We've already experienced great success as a result of Oxford Global's extensive client base and look forward to maintaining a productive, long-term relationship."
