

Medical Device Clients Reengage with Cogmedix

*Hemedex and Elemé Medical select US-based contract manufacturer
for next-generation device launch*

WORCESTER, MASS. - September 22, 2010 - [Cogmedix](#), a US-based, FDA compliant contract manufacturer for medical devices, will manufacture the second generation medical devices for two current clients: Hemedex Inc. and Elemé Medical, Inc.

"Both Hemedex and Elemé design proprietary, safety critical devices, so it is essential for these companies to work with a manufacturer they can trust," said Matt Giza, General Manager, Cogmedix. "Working with Cogmedix in the past, these two companies experienced our flexibility and dedication to FDA compliant, reliable production for safe and cost effective medical device technologies."

[Elemé Medical, Inc.](#), an aesthetics company that provides market-leading body shaping technology, reengaged with Cogmedix to manufacture the second generation of its SmoothShapes® cellulite medical device, called SmoothShapes® XV. Developed using Elemé Medical's Photomology® technology, the SmoothShapes laser is designed to offer a new and innovative way to treat cellulite safely and effectively, and achieve long-lasting results.

"We experienced exceptional results manufacturing the first generation of SmoothShapes with Cogmedix with high quality and a great deal of flexibility from the project team at Cogmedix throughout the life of the program." said Jose Do Val, Elemé Medical, Inc. "The company's consistent attention to detail made Cogmedix the obvious choice to manufacture the second generation of our product."

[Hemedex](#), the developer of a proprietary platform to quantify tissue perfusion, selected Cogmedix to manufacture the first generation of its Bowman Perfusion Monitor®, which calculates, stores and displays perfusion data. After great success in clinical and neurosurgical applications with this monitor, Hemedex will manufacture its second generation of the product with Cogmedix as well.

"Cogmedix is extremely collaborative, professional, and communicative at every step of the manufacturing process." reported Lisa Coffey of Hemedex. "These qualities make the company more than just a vendor-we continue to consider Cogmedix and the Coghlin Companies integral partners in our organization."

About Hemedex, Inc.

[Hemedex, Inc.](#), was founded in 2000 to commercialize a proprietary platform technology conceived at the Massachusetts Institute of Technology (MIT) to quantify tissue perfusion (i.e., blood flow at the capillary level). This technology addresses the need for real-time, prognostic data in complex medical and surgical procedures. These complex procedures often involve compromised vasculature and other serious pathophysiology, resulting in high rates of morbidity, delayed recuperation, poor patient outcome and higher overall costs. Hemedex's patented technology can provide an early warning of impending tissue ischemia, and it can help target appropriate therapies rapidly and accurately. In doing so, it aides in stemming some of the ill effects listed above by providing clinicians with a powerful tool to generate valuable prognostic data.

About Elemé Medical

Elemé Medical Inc., headquartered in Merrimack, N.H., is dedicated to providing market-leading technology in all areas of body shaping. SmoothShapes® system with pioneering Photomology® technology is a medical device with FDA clearance to market and CE mark approval. For more information, please visit www.elememedical.com.

About Cogmedix

Cogmedix is a US-based, FDA compliant contract manufacturer for medical and clinical devices. A subsidiary of Coghlin Companies Inc., Cogmedix focuses on the production of Class I and Class II medical and clinical devices for the critical care, home healthcare, emergency room, and industrial laboratories markets. Cogmedix focuses on aligning itself with companies seeking a compliant, conscientious, cost effective, domestic manufacturing resource to assist them with volume turnkey manufacturing. For more information about Cogmedix, please visit www.cogmedix.net.

About Coghlin Companies, Inc.

Coghlin Companies, Inc. is a privately held company in Worcester, Massachusetts spanning four generations for over 125 years. Subsidiaries include: Columbia Tech, which provides turnkey manufacturing services to a diverse customer base, including OEM's in the telecommunication, semiconductor, machine tool, medical device, alternative energy, data storage, and networking industries; DCI Engineering, an engineering services company; Coghlin Precision, a precision machining and certified welding company; and Cogmedix, an FDA compliant medical and clinical device contract manufacturer.
