

Coghlin Adds Capabilities to Help Clients Meet Market Demand

(Worcester, Mass.) July 30, 2013 – The Coghlin Companies announces they have developed significant capabilities to provide time to market services for large scale modular systems, skid platforms and integrated equipment structures such as Hydrogen Generators, Data Pods, and Photovoltaic Inverters. These expanded capabilities will allow Coghlin to help their clients to respond to market demands.

Bill Laursen, Senior Vice President of Sales and Strategy at the Coghlin Companies stated, “We have seen a surge in market activity as well as an increase in the size and scale of the products we build, including skid platforms for fuel cells, oil and gas, and modular data storage. To meet this demand we have worked diligently to build the best in class capabilities to ensure that our clients never miss a market opportunity.” With 400 caring professionals located in six world class facilities, Coghlin is poised to respond to client needs. “We are the go-to resource our clients call when they see demand in the market that they want to capture even if they do not have the internal resources to do so,” added Laursen.

The Coghlin Companies crafted the capabilities to quickly and diligently assist in converting concepts to scalable commercial products. Their services include [product engineering](#), [contract manufacturing](#) and global field service. Their experience in [product development](#), cost reduction through [design for manufactability](#) (DFM), and documentation preparation for scalable manufacturing, matched with the capabilities to cost effectively manufacture with the highest quality, ensures Coghlin Companies clients never miss a market opportunity.

About Coghlin Companies

Coghlin Companies, Inc. is a privately held company specializing in helping companies cost effectively improve their time-to-market. Based in Worcester, Massachusetts, Coghlin Companies spans four generations representing more than 126 years of manufacturing experience and leadership. Subsidiaries include: Columbia Tech, which provides turnkey manufacturing services to a diverse customer base, including OEMs in the bio-science, semiconductor, LED, medical device, green energy technology, data storage, and automation systems and controls industries; DCI Engineering, an engineering design and pre-production support services company; and Cogmedix, an FDA compliant and ISO 13485 certified medical subassembly and finished medical device contract manufacturer.
