

## COGMEDIX GROWTH LEADS TO NEW HEADQUARTERS IN WORCESTER, MA

WORCESTER, Mass. -- In a move designed to better serve the needs of its rapidly growing customer base, Cogmedix, a wholly owned subsidiary of Coghlin Companies Inc. and medical device engineering and manufacturing services provider to a broad range of medical and dental equipment innovators, has officially relocated its world headquarters to 17 Briden Street in Worcester, Massachusetts.

“We are very excited about the trajectory of Cogmedix and the recent relocation, renovation and expansion of this world-class facility. For more than 100 years, our family has shared a deep-rooted passion for the economic success of Worcester and its surrounding communities, and we look forward to adding many new jobs in the greater Worcester area for years to come. The proximity of this facility lends itself well to attract highly skilled technicians as well as engineering and supply chain personnel as our growth continues into 2015 and beyond,” stated Chris Coghlin, President and CEO of the Coghlin Companies.

Matt Giza, Vice President and General Manager of Cogmedix, said, “This move was made necessary by our steady pattern of growth. We really needed the additional space and these newly outfitted facilities are more than twice the size of our former location. This expansion will allow us to increase capacity to accommodate the needs of our customers, both existing and new, as well as provide improved inventory and supply chain management operations.”

Addressing Cogmedix’ growing niche in manufacturing finished laser and optically-based medical devices, Giza noted that upgrades included the installation of five purpose-built, independently climate-controlled, laser-safe test labs. Amenities include new cafeteria spaces, modern conference rooms, and

a new Customer Convenience Center featuring fully equipped workspaces exclusively for visiting clients to enable a more intimate and efficient product launch experience with total transparency.

In addition to expanded production capacity and other benefits made possible by the much larger facility, the address itself has significant advantages. “Our new location,” Giza explained, “is at the junction of Interstate I-190 and I-290, providing quick and easy access to the entire region’s transportation infrastructure, including major airports in Boston, Worcester, Providence, and Hartford. We are also only about a mile from Worcester’s Union Station. All of this makes it possible for our visiting clients to arrive by air or rail and be hard at work in their own dedicated spaces in about an hour or less.

“We also couldn’t help but take notice of the rapidly growing biotech and biomed industry presence in the neighborhood,” said Giza. “Both regionally and nationally, Worcester has become well-known as a home for these cutting-edge industries, and Cogmedix is now located right in the heart of it all. We are immediately adjacent to WPI’s Gateway Park, Massachusetts Biomedical Initiatives (MBI), as well as multiple life science companies in the immediate vicinity, something that will surely add to the atmosphere of innovation and create real opportunities for meaningful collaboration.”

#### About Cogmedix:

Cogmedix is a team of talented and caring associates bringing OEM medical technology to life. Providing turnkey manufacturing services to a broad range of medical and dental OEM’s, Cogmedix delivers new products to market with rigorous compliance adherence and high quality. Cogmedix provides a high level of flexibility in product launch and demand management and aligns itself with innovative companies that maintain similar high standards in honesty and integrity. Cogmedix is a subsidiary of Coghlin Companies, Inc., a concept to commercialization firm. Visit Cogmedix and sign up for the e-newsletter at [www.Cogmedix.com](http://www.Cogmedix.com).
